About

I am a design-driven **UI/UX Designer** dedicated to crafting clear, intuitive interfaces that solve real user problems. My philosophy is that the best design is invisible reducing friction and anticipating needs to help people achieve their goals effortlessly

Currently at **Softvance**, I specialize in turning complex requirements into practical solutions for healthcare, fintech, and SaaS products, collaborating closely with cross-functional teams to deliver user-cantered results.

Experience

UI/UX Designer (On-Site)

Softvance Delta

Feb. 2025 – Currently

Description:

Working across healthcare, fintech, and SaaS products, where complexity is part of the job. I focus on turning messy requirements into clean, structured, and usable experiences. From wireframes to high-fidelity designs, every step is guided by clarity and real user needs. Because when products feel simple, users don't notice the effort behind them.

Jr. UI/UX Designer (Remote)

Heva (Tele-health Platform)

Aug. 2024 – Feb. 2025

Description:

The onboarding experience was slow, confusing, and causing users to drop off early. I redesigned the full journey to make it faster, clearer, and easier to complete. Focused on simplifying steps, improving flow, and removing unnecessary friction points. Because in healthcare, confusion doesn't just frustrate — it blocks access.

Education

Narsingdi Polytechnic Institute

Oct 2021 - Jan 2025

Diploma in Computer Science & Technology (CST)

Graduated with a technical diploma that bridges the gap between engineering and design, empowering me to create interfaces that are both user-friendly and technically viable.

Course Certifications

Google UX Design

2025

Google, Coursera

Professional UX/UI Design

2024

Creative IT Institute
